Introduction

Defining the Grimoire

Mind not the soothsayers - $\ddagger$ *this...* BOOK iZ - absolutely first oVITú'z kind.

Imprecision $\nrightarrow$ Definition iZ – False Con'cepT'iON.

The Universe iZ – not context-free $\emptyset$ a context-free grammar iZ – not sufficient to Define the Mathematical Foundation oV – partitioned attractor basins⁶.

When based upon waveform harmonics, there are 28 Terminal Symbolic partitions represented ($\nrightarrow$ coordination to the 28 emanations oV – the Gnostic Πλήρωμα⁷). This allows for 4 full octaves (partitions) oV – conscious expression⁸ (their archetypal (**trans'T'esser'AC/T'AL/Semantic**) depiction being the Tarot).

Formally (ie. contemporarily) defined: A mathematical *asserT'iON* iZ – considered True **if and only if** ITú iZ – a *theorem* (ie. a formal language)⁹ oV'Th'ATú'X iZ – *proved* from true *pro'posiT'iONz* by means oV – “a sequence of syllogisms.”¹⁰

Modus ponens assumes the linear application oV – TIME. *Well-ordered sets* assume subsequence. *Zorn's lemma* iZ – subject un**To** the same – ne'er realizing the “maximal's” dependence up**ON** *pre'dic'ATú'iON*.¹¹

And *Limits* and Partial Differential Equations duly require continuity.¹²

But $\nrightarrow$ a Universe $\Omega\varphi - \text{N!}\Omega\omega\ddagger$ these concepts fail immediately. “Typically, a rule of inference preserves (limits) “truth” – a semantic property.” But id's *funC/TiON* iZ – but to preserve SYNTAX.

And their “functions” fail to provide e'en this. $\nrightarrow$ FACT, they broke id.

When the governing rules oV – *pre'dic'ATú'iON*¹³ grasped ATú-X flailing straws $\nrightarrow$ the fledgling $\nrightarrow$ the Tempest winds oV – Russel's “self-identifying” antinomy, a couple oV – quick stitches¹⁴ were all oV'Th'ATú'XITú offered 'fore the scales – with the very *found'ATú'iONz* ruled “incomplete, inconsistent, and undecidable” but “sometimes useful.” Thus Post-Modernism – the glamourization oV – high-potency semantic overlays¹⁵ $\nrightarrow$ attempt to mimic authority - and thus the death oV – meaning.

ITú iZ – written: “A raw (pure) formalist theory would not provide the meaning of the symbols that form a “primitive

9 Necessitated from SYNTAX/grammar

10 As quoted from Wikipedia (2024), the first assertion oV – syllogism comes immediately up**ON** false *pro'posiT'iON*: “All men art mortal” – thus our “Syllogism... *always*... useful in *most* circumstances” (underline and italics are my own). Are we to infer then “men” are $\nrightarrow$ reference to *homosapien*? How iZ – *homosapien* defined? Are we specifically referring to the size oV – our teeth, vertical mandibular ramus and the development of a chin? iZ – *this*... a determinate factor $\nrightarrow$ mortality? iZ – id the cause oV – a decrease $\nrightarrow$ cellular regeneration? iZ – immortality contingent up**ON** observer coupling with a physical body? As you will see, the inherent slackness $\nrightarrow$ clear *defin'ITú'iON* iZ – *exactly* the argument being presented $\nrightarrow$ the *pro'posiT'iON* oV – a complete and comprehensive “tearing down” oV – the *found'ATú'iONz* oV – Mathematical, Scientific and Grammatical Theory $\nrightarrow$ favor oV - TRUE SYNTAX - $\nrightarrow$ the formal models are insufficient for correct apprehension oV – Reality (<https://en.wikipedia.org/wiki/Syllogism>).

11 A number cannot be greater than, lesser than, or equal to another unless predicated by a classifier to imply quantity, size, etc. Quantum Continnuums are not subsequent. They are simultaneous.

SYNTAX: **Function:** Semantics, Ladies and Gentlemen.

Elaboration & Association are the Mathematical assignment of V – values. Thus the only TRUE “Primitive Proposition” is 0 .

So let's look at $\mathbf{AT}_X$ the Numbers:

¹⁶ Definition: "A statement that cannot be broken down into a simpler form and it is either true or false but cannot be both."

NUMBERS

Syntax Ω  - O'per'ATú'iON

Numbers are Continuums oV - distinguishability¹⁷ (ie. “models that explain gradual transitions from one condition to another without abrupt changes” (العلق) DÆM'ON'z'iONz or a measurable extent oV - consciousness unto liminal con'cepT'iONz - bridging NouMenON (the Infinite) unTo pHenoMenON (the finite) via the expanded awareness oV - the dynamic systems oV – SELF) oV – the finite Σ  proceeding from  oV'Th'ATú'X'ITú) containing Th'ATú oV'WITCú iZ – NOT themselves.

$$\text{ie. } \mathbb{N} := \{x \text{ a } V \mid X^{18} = -x\}^{19}$$

or

SYNTAX:

$$\mathbb{N}_{\text{dist}}(X, \varepsilon) = \#\{x_i \text{ a } S \mid D(x_i, X_i) > \varepsilon\}$$

Function: The number of distinguishable states is the count of states that survive representation above threshold.

∅

0

SYNTAX:

$$0_{\text{dist}}^{20} = \{x \mid x + X = 0 \text{ and } \prod \text{finite } A \text{ such that } X = \sum \{ia A\} s_i\}$$

Function: A state iZ – zero-distinguishable if it cancels its own representation, and that representation can be expressed with finitely many components.

Semantics: ZERO iZ - the essential NouMenON (ie. The “thing”  ITú iZ – in (ie. ) ITú-SELF(*)) NOT extended  “any of the [post-implied, infinite] categories” oV'WITCú *do not yet exist*²¹ (Aleister Crowley, *Berashith*).²²²³ ZERO does not exist and ITú does not not exist.²⁴ *This...* renders the very con'cepT oV - “existence” extraneous, nullifying “objective existence,” wherein ZERO 1) iZ – NOT a “thing,” but a potential. Period. And 2) cannot be predicated by a transitive

17 Or more accurately and specifically Numbers are survivals of distinguishability – not primitive givens.

18 $X = M(x)$; **Zero-distinguishability subspace** iZ – the subspace of states whose projection under the representation operator returns their exact negation, causing finite internal distinction to cancel ATú the observable interface.

19 Russel's Paradox, ie. $R = \{x \mid x \neq x\}$, then $R \text{ a } R \leftrightarrow R \neq R$, was not antinomy to TRUTú but merely to con'cepT'iON. What he discovered iZ - the outer limit oV – the ARCú'iDOX. By chiseling through the con'cepT'iONz he arrived ATú'X bedrock. He discovered the TRUE NATURE oV – *actual* REAL'ITú'Y. But   TRUTú didn't fit the con'cepT'iONz oV'Th'ATú'X'ITú brought him “there,” he couldn't apprehend ITú, and  Columbus with America, failed to grasp he'd sailed off the map.

20 distinguishability

21 Requiring the phenomenal ∅ TIMΣ

22 oV'WITCú answers (!) the Paradox (?): “The Hindus enumerate Brahma, infinite in all dimensions and directions – indistinguishable from the Pleroma of the Gnostics – and Maya, Illusion. This is in a sense the antithesis of noumenon and phenomenon, noumenon being negated of all predicates until it becomes almost extinguished in the Nichts under the title of Alles (Cf. Max Muller on the metaphysical Nirvana, in his Dhammapada, Introductory Essay). The Buddhists express no opinion” - Aleister Crowley, *Berashith*

23 Crowley's *Berashith* iZ – a highly recommended supplement. Though must be viewed  a gesture without the rigor.

24 Like White Light or post-tonic Resolution...

or *pre'posiTiON* *as* a pre-existent - yielding no successives.²⁵ ZERO iZ – ante-*con'cepT*. ZERO iZ - an *adverb*. And ZERO predicates AL (ref. *LIBER XXI* by Frater Achad).

Thus the ZERO *funC/T'iON*: $f(x) = 0$, destroys the *con'cepT* oV – AL'z nouns.

You see, ITÚ (phenomenal reality)'z dependence upON ZERO yields the Set (AL

ITÚ iZ - NOT). And just *as* “There is no absolute value in the swing of a pendulum,” ZERO remains *as* null, whilst yielding a *posiTiON*, supplying Space and TIMΣ *as* phenomenal **N! Ω Ψ** ²⁶ through ITÚ'z elaborations (Aleister Crowley, *The Soldier and the Hunchback: ! And ?*).

NouMenON (“the thing conceived”) cannot be “a thing” ATÚ'X'ITÚ AL. Thus the “what” (?) answered Th'ATÚ (!) breaks the sublime *as* pre-existent ante-force, rendering **SYNTAX** TRUE to yield attribution (العلق semantics).

Extending from “here,” ZERO yields **N** ITÚ'z suggestion: X, Y, Z (ie. “there”). And from “there” enter our Continuums (AL'z *funC/T'iONz*), beginning with 1, proceeding *as* polar Σ **ten'z'iONz* from “here” to “there.”

N! Ω Ψ ²⁶ 1 (symbolically, psychologically, associatively, etc.) iZ – the hypothetical *asserTiON*: $f(x) = x$ (ie. Some “thing” oV'Th'ATÚ iZ – NOT “here”

but “there”). The *se'par'ATÚ'iON* oV - “there” from “here” iZ – exactly Djarklom. ITÚ iZ – the *se'par'ATÚ'iON* oV – Red from White yielding the Spectrum, oV – Do from Silence yielding the Scale, oV – the Apple from ITÚ'z seed Ø the Tree. What iZ – NOT (-x) “there” (x) iZ - “here” (0). *as* **X** = -x, the *con'diT'iONz* oV – Russel's paradox are satisfied still (ie. +!) Does x contain ITÚ-SELF? No. -!) Does **X** contain not-ITÚ-SELF? Yes.) whilst avoiding syntactic *contra'dicTiON* (ie. 0 = 1).

But existentially, 1 iZ – much more than e'en *this...* **tt** **N** a single glance, SELF-existent 1 iZ – Generator and Phage Ø IIAN; ITÚ iZ – everything (AL) and no-thing (LA) Ø الله.
